UTI = urinary tract infections (more than 2 episodes per year); APN = acute pyelonephritis; CMV = Cytomegalovirus; EBV = Epstein Barr virus; BKV = Poliomavirus.

Urinary tract infections are considered when more than 2 episodes per year. Acute pyelonephritis is always confirmed by CT or MR study; CMV, EBV and BKV infection are diagnosed by detectable viremia > 2000-5000 copies/ml. Regarding BKV, a renal biopsy was performed in cases of worsening of renal function associated with detectable BKV DNAemia.
