Diabetes and The Kidney
225 Effect of Spironolactone and Amiloride on Thiazolidinedione-Induced Fluid Retention in South Indian Patients with Type 2 Diabetes
Vijay Viswanathan, Viswanathan Mohan, Poongothai Subramani, Nandakumar Parthasarathy, Gayathri Subramaniyam, Deepa Manoharan, Chandru Sundaramoorthy, Luigi Gnudi, Janaka Karalliedde, and Giancarlo Viberti

Epidemiology and Outcomes
233 Albuminuria and Rapid Loss of GFR and Risk of New Hip and Pelvic Fractures
Joshua I. Barzilay, Peggy Gao, Catherine M. Clase, Andrew Mente, Johannes F.E. Mann, Peter Sleight, Salim Yusuf, and Koon K. Teo, on behalf of the OnTARGET/TRANSCEND Investigators

241 Model Comparisons of Competing Risk and Recurrent Events for Graft Failure in Renal Transplant Recipients
Ingvar Holme, Bengt C. Fellström, Alan G. Jardine, Anders Hartmann, and Hallvard Holdaas

248 Association of Physical Activity with Survival among Ambulatory Patients on Dialysis: The Comprehensive Dialysis Study
Kirsten L. Johansen, George A. Kayser, Lorien S. Dalrymple, Barbara A. Grimes, David V. Glidden, Shuchi Anand, and Glenn M. Chertow

ESRD and Chronic Dialysis
254 Dialysis Modality and Correction of Uremic Metabolic Acidosis: Relationship with All-Cause and Cause-Specific Mortality
Tania Vashistha, Kamyar Kalantar-Zadeh, Miklos Z. Molnar, Klara Torlén, and Rajnish Mehrotra
See related editorial on page 177.

265 Early Dialysis Initiation and Rates and Timing of Withdrawal From Dialysis in Canada
Amanda D. Ellwood, S. Vanita Jassal, Rita S. Suri, William F. Clark, Yingo Na, and Louise M. Moist
See related editorial on page 179.

271 Effect of Oral Anabolic Steroid on Muscle Strength and Muscle Growth in Hemodialysis Patients
Ouppatham Supasyndh, Bancha Satirapoj, Pornanong Aramwit, Duangkamol Viroonudomphol, Amnart Chaiprasert, Vipa Thanachatwej, Supat Vanichakarn, and Joel D. Kopple

Mineral Metabolism/Bone Disease
280 Randomized Clinical Trial of the Iron-Based Phosphate Binder PA21 in Hemodialysis Patients
Rudolf P. Wüthrich, Michel Chonchol, Adrian Covic, Sylvain Gaillard, Edward Chong, and James A. Tumlin

Renal Transplantation
290 Pregnancy in Renal Transplant Recipients: A UK National Cohort Study
Kate Bramham, Cathy Nelson-Piercy, Haiyan Gao, Matthias Pierce, Naomi Bush, Patsy Spark, Peter Brocklehurst, Jennifer J. Kurinczuk, and Marian Knight

On the Cover
What’s the diagnosis? Urine uric acid crystals as viewed under non-polarized (left side) and polarized (right side) illumination (400× magnification). Uric acid crystals form in acidic urine, typically pH < 6.0, and elevated urine uric acid is not always present. Uric acid crystals are most often rhomboid plates, as seen in the figure, or rosettes as opposed to the needle shaped monosodium urate crystals found in joint fluid of patients with acute gouty arthritis. Under non-polarized light urine uric acid crystals are colorless or may have may have a yellow or reddish-brown hue; under polarized light they appear polychromatic. (Image and text provided by Paul M. Palevsky, MD, FASN, Renal Section, VA Pittsburgh Healthcare System and Renal-Electrolyte Division, University of Pittsburgh School of Medicine, Pittsburgh, PA)
