

Supplemental Figures – online only

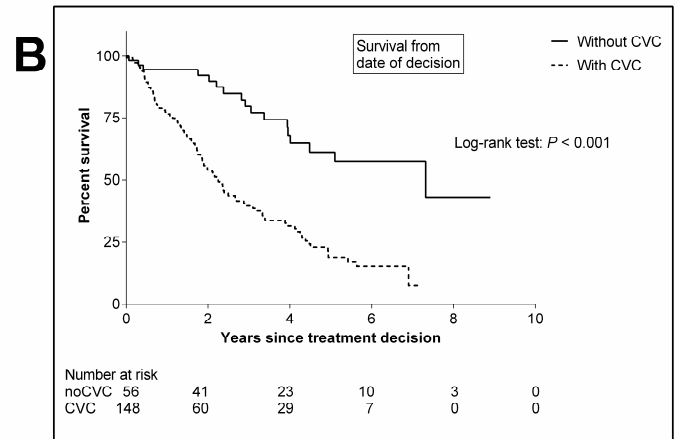

**Supplemental Figure 1. Kaplan-Meier survival curves for those without (A) and with (B) cardiovascular comorbidity (CVC).** Only survival calculated from the time of modality choice is shown. Similar results were observed using the other starting points.

## CM group

## RRT group

**Supplemental Figure 2. Kaplan-Meier survival curves comparing survival between patients with and without cardiovascular comorbidity (CVC) within the CM group (A) and the RRT group (B).**

Only survival calculated from the time of modality choice is shown. No differences were observed using the other starting points.
